

The feedback I received: "Commands are working as expected. No information has been provided regarding Lamport clock. Testing seems fine but more ideas will be appreciated. You can have a look at the testing for assignment 2 announcement."

In response to the feedback I received, I have made several improvements to the project:

Lamport Clock Implementation: I have included a new section in the README file to discuss the implementation of the Lamport clock. This addition aims to provide a clear and detailed explanation of how Lamport clocks are utilised within the project.

Expanded Testing Strategy: To address the feedback's request for additional testing ideas, I have significantly expanded the testing strategy and implemented more types of testing such as end-to-end testing or fault testing.
